1. Claims 8, 13-15, 18, 20, 22, 23 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention as previously set forth.
2. Claim 16, 17, 19, and 21 are rejected under 35 U.S.C. 102(b) as being anticipated by Blackwelder (5803266). Blackwelder teaches a case having a body, a closure, a panel comprising hook and loop locate on the outer surface (note portion 40), and first overlay having front and back side including a hook and loop material on the back side.
3. Claim 16, 17, 19, and 21 are rejected under 35 U.S.C. 102(b) as being anticipated by Marcolini, Jr. (5845334). Marcolini, Jr. teaches a case having a body, a closure, a panel comprising hook and loop locate on the outer surface (note portions 19, 20 in Figs. 5-6), and first overlay having front and back side including a hook and loop material on the back side.
4. Claim 7, 9, 16, 17, 19, and 21, are rejected under 35 U.S.C. 102(b) as being anticipated by Kellin et al. (5136726). Kellin teaches a case having a body, a closure, a panel comprising hook and loop locate on the outer surface, and first overlay having front and back side including a hook and loop material on the back side.
5. Claims 1-7, 9-12, 16, 17, 19, and 21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Udwin et al. (6106015) in view of Marolini, Jr. (5845334), or in the alternative, under 35 U.S.C. 103(a) as being unpatentable over Marolini, Jr. in view of Udwin. Udwin et al. teaches a case formed by a pair of clamshell members. Udwin meets all claimed limitations except for the patch outside. Marcolini, Jr. teaches that it is known in the art to provide a patch outside a case with the patch being indented into the exterior face (note the teaching in col. 3, ln. 40; col. 4, ln. 50). Note the claims 1 and 5 where claim 1 recites the material forming article defines a recessed portion and the hook and loop fastener is in the

Art Unit: 3727

recessed portion. It would have been obvious to one of ordinary skill in the art to provide the patch as taught by Mrolini, Jr. to decorate the case.

In the alternative, it would have been obvious to one of ordinary skill in the art to provide the case of Udwin to provide an alternative case.

6. Claims 1-7, 9-12, 16, 17, 19, and 21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wishnia (2656870) in view of Blackwelder (5803266) or Taguchi (6519779). Wishnia teaches a case having outer enclosure defined by a pair of clam-shell member, a hinge, a closure member 14, 15, each of the clam-shell having an exterior surface, and at least one overlay cut within the perimeter of the shape of the exterior surface. Wishnia meets all claimed limitations except for the attachment being hook and loop fasteners. It would have been obvious to one of ordinary skill in the art to provide to provide hook and loop fastener as taught by either Blackwelder or Taguchi to provide the desired attachment for the decorative patch.

Regarding claim 6, it would have been obvious to one of ordinary skill in the art to provide to provide a circular patch to provide the desired shape for the decorative effects.
